

Oversize/Overweight Permit Regulations

Missouri Department of Transportation

Title 7 – Department of Transportation
Division 10 – Missouri Highways and Transportation Commission
Chapter 25 – Motor Carrier Operations

7 CSR 10-25.020 Oversize and Overweight Permits

Purpose

This rule provides a uniform system for issuing special permits to regulate vehicles used on the state highways which when loaded exceed the limitations on length width, height, and weight established in Chapter 304, RSMo.

Effective Date: February 28, 2009

Kevin Keith
Chief Engineer
MoDOT

General Regulations

General Regulations

(1) General Regulations for Oversize/Overweight Permits.

(A) In the design and fabrication of all vehicles, machinery, equipment, structures, buildings, or other units or components, careful consideration must be given to the legal and physical limitations applicable to all available forms of transportation between point of fabrication and the original or subsequent destinations.

(B) Permits will not be granted for travel on the state highway system for movement of a load reducible in size or weight, except for:

1. Farm products (hay) and equipment with dual tires as permitted in sections (6) and (10).
2. Emergency response vehicles loaded with salt, sand, chemicals or a combination thereof, with or without a plow or blade attached in front, and being used for the purpose of spreading the material on state highways that are or may become slick or icy, or
3. Military vehicles transporting marked military equipment or material.

Reducible portions of any oversize or overweight load shall include, but are not limited to, any attachment, accessory, member, or assembly designed to be detached with hand tools.

(C) Unladen vehicles or combinations are to comply with legal size and weight limitations as listed in Chapter 304 of the Missouri Revised Statutes unless exceptions can be justified by safety considerations based on an oversize or overweight object to be transported by the vehicle.

(D) Economic factors in either the saving of time or costs for routing will not be considered of primary importance in the routing process and the department reserves the right to designate routing and travel time for all movements. Safety, structure capacities and clearances, roadway widths, and traffic volumes will all be considered in route determination. The routing will use the designated state highway system as shown on the Missouri Vehicle Route Map and/or be as direct as possible. When other streets or highways off the state highway system are used, it will be the responsibility of the applicant to obtain approval from the agency responsible for that off-state highway and adhere to all bridge capacity postings off the state highway system.

(E) Limitations for all oversize and overweight load movements will be determined by the least hazardous road conditions and volume of traffic which will be encountered and the practical capacity of the roadway, structures, and the vehicle involved, based upon axle loads. All responses to requests for routing approval prior to application are furnished for general information only. Due to constantly changing highway conditions such routing approval is subject to change without notice.

(F) Exceptions may be made for feasible oversize and/or overweight movements certified as essential to national defense, upon receipt of written documentation by designated officials within the Defense Department.

(G) Permits may specify maximum and minimum speeds to reduce hazards or control impact factors on pavement or structures and may specify lane restrictions while crossing structures to provide for better load distribution to the structural members of that structure. Power units shall have sufficient weight and power to handle the load safely and maintain reasonable speeds.

(H) Permits for round trips will not be issued. Each single trip permit covers the movement of one (1) load only, between one origin and one destination, except for the multi-stop permit designed for transportation of farm implement delivery only (legal loads are not considered for multi-stop permits since permits are not required for legal loads). Moves must be completed in seven (7) moving days, except for multi-state permits, which must be completed in ten (10) days, and blanket permits which are for a specified period.

(I) Movement is restricted on the following holidays: New Year's Day (January 1), Memorial Day (last Monday in May), Independence Day (July 4), Labor Day (first Monday in September), Thanksgiving Day (fourth Thursday in November), and Christmas Day (December 25).

1. The restriction for Thanksgiving will begin at 12:00 noon on Wednesday and apply until one-half (1/2) hour before sunrise on the following Monday. In the event a holiday falls on Saturday, the restriction will apply to the preceding Friday. If a holiday falls on Sunday, the restriction will apply to the following Monday. On all holidays, the restriction will begin at 12:00 noon on the day preceding the holiday or the holiday weekend period.

2. All offices are closed on the holidays listed in paragraph (1)(I). Only the Jefferson City office will be open on Martin Luther King Day (third Monday in January), Lincoln's Day (February 12), Presidents' Day (third Monday in February), Truman Day (May 8), Columbus Day (second Monday in October), and Veterans' Day (November 11). All other offices will be closed on these dates, and on any date designated by the governor as a holiday; however, movement under permit is allowed on these days.

(J) Travel under permit must be with properly licensed, insured and permitted vehicles under Chapters 260, 301 through 307, 390 and 622 of the Missouri Revised Statutes, and vehicles must be licensed for maximum weights in order to obtain overweight permits.

(2) Financial Responsibility

(A) An applicant for an oversize/overweight permit shall have on file with the Missouri Department of Transportation's Motor Carrier Services Division an approved proof of coverage for bodily injury to, or death of, an individual and for loss or damage to property, in a form satisfactory to the Missouri Highways and Transportation Commission. Proof of coverage shall be effective during all of the applicant's oversize/overweight operations authorized under such permit covering each motor vehicle operating under the authority of the applicant's permit in amounts not less than the following:

Schedule Of Minimum Limits Of Combined Single Limit Automobile Liability

Type of Move	Amount
1) Routine	\$750,000
2) Super Heavy and Large Loads	\$2,000,000
3) Noncommercial Building (House) Movement	\$2,000,000

(B) Public Liability Insurance and Surety Bond Forms. The proof of insurance shall be on a certificate of liability form (Acord). The certificate shall be duly completed and executed by the applicant's insurer or an agent of the insurer authorized to issue a policy on the insurer's behalf. The approved certificate of liability insurance coverage shall include any damage to the state highway system such as the road surface, shoulders, bridges, traffic control devices, utility facilities, and any other state highway system-related property which is caused by, and is the legal responsibility of, the applicant, the applicant's vehicle and/or the applicant's officers, agents, employees or operators. A surety bond (Form G) in accordance with 7 CSR 265-10.030 may be accepted in lieu of the certificate of liability. The bond shall be duly completed and executed by the surety and principal. Such surety bond shall be in a duration and amount as the commission may determine to be adequate for the commission's protection and to be provided by sureties or financial institutions satisfactory to the commission.

(C) Cargo. Any automobile insurance policy required under this administrative rule shall not include coverage of the cargo transported under the permit, and, instead, any cargo transported by the applicant under a permit issued under this administrative rule shall be insured under a separate insurance policy. Proof of cargo liability is not required to be filed with the Missouri Department of Transportation.

(D) Filing Waiver. If the applicant has proof of public liability insurance (form E) on file with the Missouri Highways and Transportation Commission pursuant to 7 CSR 265-10.030 or the motor carrier has

been approved to be self-insured for motor carrier operations, no additional proof of insurance is required to be filed, provided the limits of liability pursuant to such public liability insurance or self-insurance is consistent with the limits established in this rule.

(E) Cancellation. The applicant shall immediately notify the Missouri Department of Transportation Motor Carrier Services Director in writing of cancellation of the applicant's proof of insurance. All non-expired permits issued to the applicant shall be void and requests for additional permits shall not be granted until the applicant submits new proof of coverage consistent with this administrative rule to the Motor Carrier Services Director.

(F) Rejection. Proof of insurance may be rejected and notification sent to the applicant of the rejection, if-

1. Proof of insurance was not submitted on the proper form(s) or information contained on that form has not been completed in order for the division to determine if the limits of liability have been met;
2. The form was not properly completed;
3. The limits of liability were contrary to limits established within this rule; or
4. The proof of insurance appears to be invalid or the authenticity of the document cannot be verified.

(G) Filing of Documents. Insurance companies offering motor carrier insurance certificates, cancellation notices, or other documents for filing with the division pursuant to this rule shall deliver the documents to the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102 by any of the following methods: personal delivery, U.S. mail, express courier delivery, FAX, electronic mail (E-mail), or other approved electronic media. A person or company that offers photocopies, FAX copies, or electronic documents for filing shall be bound by them as if they were signed originals.

(H) Failure to Comply. The Motor Carrier Services' director or his/her representative may reject an applicant's request for a permit or suspend the applicant's privileges of obtaining oversize/overweight permits for failure to comply with this section of the rule.

(I) Excessive Overweight. Permits issued for excessive overweight may require additional financial responsibility to protect the state in regard to excessive damage to the state highway system and its facilities.

(J) Refer to subsection (8)(C) for financial responsibility for escorts.

(3) Agreements and Conditions

(A) The permittee agrees to the following conditions when a permit is issued:

1. The permittee named therein agrees to assume full responsibility for injury to persons or damage to public or private property, including the state highway system and its facilities, caused by the movement of the vehicle or its load under the special permit involved;

2. The permittee agrees to hold harmless the Missouri Highways and Transportation Commission, the Department of Transportation, the Missouri State Highway Patrol, their agents, servants and employees, from any and all claims, judgments, damages or expenses of any kind on the part of the applicant, permittee, or any person, firm, or corporation having an interest in either the vehicle, the load, or other property involved in the movement over the route prescribed in said permit;

3. The permittee, as a condition to the issuance of a special permit, agrees to indemnify the Missouri Highways and Transportation Commission, the Department of Transportation, the Missouri State Highway Patrol, their agents, servants or employees, for any sums which it, its agents, servants or employees are or may be required to expend in defense of any claims or actions for damages and to indemnify the Missouri Highways and Transportation Commission, the Department of Transportation, the Missouri State Highway Patrol, their agents, servants or employees, arising out of the movement, under this special permit, of a vehicle or load over the route prescribed by the Missouri Department of Transportation, its agents, servants or employees;

4. The permittee will cause the operators of all motor vehicles involved in the movement to take all necessary precautions to avoid hazards existing along the prescribed route, such as, but not limited to, construction projects, physical restrictions, or conditions which will not permit the movement of the vehicle and its load without detriment to the state highway or its drainage structure, signs, guardrails, signals, shoulders, pavement, right-of-way or any other facility;

5. The permittee or their representative must physically drive the proposed route to be used prior to issuance and attest that all turns, curves, etc. can be safely negotiated if the load is greater than 120' long. If the load does encounter problems negotiating such, the company will be charged new permit fees (including a bridge study analysis for superloads). In addition, penalties may be assessed and future permit applications may be denied.

6. Should the permittee or the permittee's officers, agents, employees or operators encounter a condition on the route prescribed not contemplated by the permit, or signs or markings indicating an

emergency condition creating a reasonable doubt as to the continuance of the trip, the permittee, officer, agent, employee or operator of the vehicle shall immediately notify the appropriate official or employee of Motor Carrier Services Division of the Missouri Department of Transportation for a suggested course of action. In any event, departure from a prescribed route, except by specific authorization of Motor Carrier Services Division, renders the permit void;

7. Any misrepresentation in the application for a special permit or any operation not made in strict compliance with the permit and not in compliance with 7 CSR 10-25.020, except as specifically exempted, is unlawful and renders the permit void;

8. Any permit used for a movement other than that for which granted or any permit that has been altered, is void in its entirety and the movement involved will be in violation of the law, as though such permit had never been granted;

9. Permits voided by a violation shall be surrendered to any law enforcement officer or to any employee of the Missouri Department of Transportation and permits so surrendered shall be returned to the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102;

10. A new permit and required fees covering the remainder of the movement will not be issued until all charges arising out of the violation have been satisfied and the routing or movement modified to meet the regulations established herein;

11. Permits are issued by authority of law only when the public safety or public interest justifies their issuance. Any misrepresentation in the application or violation of the terms of the permit may result in denial of future applications of the violator; and

12. Permission is granted only for dimensions and up to the weight, as specified, and compliance in all other respects is required with Chapters 260, 301 through 307, 390, and 622 of the Missouri Revised Statutes as amended, all other applicable state and federal laws and rules and regulations of state and federal regulatory bodies.

13. All permittees are responsible for the accuracy of their permits and shall notify the Missouri Department of Transportation, Motor Carrier Services Division of any inaccuracies before movement commences.

(B) In addition to these agreements and conditions, the following will apply:

1. All violations or misrepresentations will be recorded and the permittee will be notified in writing that future violations may result in a suspension or revocation of privileges;

2. Flagrant or repeated violations of permit restrictions and/or traffic safety laws in combination thereof are not in the interest of public safety and the permittee will be advised in writing, if his/her record is such that future permits should not be granted in the opinion of the Missouri Department of Transportation. A suspension of such privilege shall last for two (2) weeks and a revocation of such privilege for one (1) year;

3. Suspensions, revocations and re-instatements may be modified or rescinded by the Motor Carrier Services' director or his/her representative and their decision shall be final.

Fees

Fees

(4) Permit Applications, Permit Transmissions and Permit Fees

(A) All oversized and overweight applications should be completed and fees filed at least two (2) days prior to the date of movement, except permits covered by sections (15) and (16) should allow two (2) weeks advance notice. This will allow sufficient time for any investigations, studies, or analysis necessary for the issuance of the official permit.

(B) Applications for permits are accepted in person, by mail, by telephone, and online.

(C) Applications may be reproduced or copies will be furnished upon request. Each application shall show all information requested in regard to the applicant, load description (including make, model, serial number, and dimensions), and vehicle description (including vehicle combination, year, make, vehicle identification number, insurance, and license). The type of power unit (truck or tractor) and trailer (semi or other configuration) shall also be required.

(D) Application for an oversized permit must show the width, length and height of the commodity being hauled as well as the overall width, overall length, and overall height. Application for an overweight permit must show axle loads and axle spacings measured center-to-center between each axle. Additional information may be required to complete the application.

(E) Special permit fees are payable prior to the issuance of the permit. If the permit becomes invalid for any reason, the original fee shall be nonrefundable and a new permit with fee will be necessary. Applicants are responsible for payment of permit fees for expired permits that are issued and left in approved status. Postal and telegraphic money orders, personal, company, certified and cashier's checks, credit cards and electronic funds shall be made payable to the "Director of Revenue." Cash is also accepted. The special permit fees are as follows:

1. Single trip oversized permits including pre-issue—\$15;
2. Single trip oversized permits in excess of sixteen feet (16') wide, sixteen feet (16') high, or one hundred fifty feet (150') long—\$15 plus \$250 movement feasibility fee;
3. Multi-stop oversized permit—\$25 (farm implements only);
4. Single trip overweight permits up to and including one hundred sixty thousand (160,000) pounds gross weight—\$15 plus \$20 per each ten thousand (10,000) pounds in excess of legal gross weight;
5. Single trip overweight permits in excess of one hundred sixty thousand (160,000) pounds gross weight—\$15 plus \$20 per each ten thousand (10,000) pounds in excess of legal gross weight plus bridge and roadway analysis fee of \$425 for each permit for moves from 0–50 miles in length; \$625 for 51–200 miles; \$925 for over 200 miles (see section (15)). Identical permit applications with identical vehicle

configurations will only be charged one bridge and roadway analysis fee if the original bridge study is less than thirty (30) days old for loads in excess of three hundred thousand (300,000) pounds and if the original bridge study is less than sixty (60) days old for loads weighing less than three hundred thousand (300,000) pounds. An additional four hundred twenty-five dollar (\$425) bridge study fee will be charged if the applicant modifies dimensions or weights on an application and a new bridge analysis is required after the original analysis has been completed;

6. Annual blanket emergency overweight permit (round trip)—\$624—(fee will be prorated quarterly);

7. Annual blanket oversize permit—single commodity—\$128 (fee will be prorated quarterly);

8. Annual blanket oversize permit—multiple commodity—\$400 (fee will be prorated quarterly);

9. Annual blanket overweight well drillers or concrete pump truck permit—\$300 (fee will be prorated quarterly);

10. Thirty (30)-day blanket permit—\$300;

11. Project permit—\$125;

12. Highway crossing permit—\$250;

13. Noncommercial building movement (in excess of routine dimensions)—\$265;

14. Single Trip Commercial Zone Bridge Analysis \$265; and

15. Permit amendment fee—\$2. Single trip permits may only be amended within two (2) business days of permit start date. The start date and any other component will be amended if permit effective date is in the future. The permittee, origin, destination, and/or commodity being hauled/towed will not be amended if the permit is already in effect. Annual blanket permits may be amended one time throughout the year for truck make and/or license.

(F) Fees shall not be required for permits covering the movement of vehicles and loads owned and operated by governmental subdivisions or agencies.

(G) Permits may be applied for and picked up at the locations listed in subsection (4)(H) during regular business hours of 7:30 a.m. to 4:00 p.m. Monday through Friday except holidays listed in paragraph (1)(I). Telephone applications are accepted from 7:00 a.m. until 5:00 p.m. at (800) 877-8499 or (573) 751-7100 Monday through Friday except holidays listed in section (1). Internet access is also available twenty-four (24) hours a day, seven (7) days a week.

(H) Office locations for Missouri Department of Transportation—

1. Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102, (800) 877-8499 or (573) 751-7100;

2. St. Joseph—District 1—3602 North Belt Highway, Box 287, St. Joseph, MO 64502, (816) 387-2350;
3. Macon—District 2—U.S. Route 63, PO Box 8, Macon, MO 63552, (660) 385-3176;
4. Hannibal—District 3—Highway 61 South, PO Box 1067, Hannibal, MO 63401, (573) 248-2490;
5. Lee's Summit—District 4—600 NE Colbern Road, Lee's Summit, MO 64086, (816) 622-6500;
6. Chesterfield—District 6—14301 S. Outer 40, Chesterfield, MO 63017-5712, (314) 340-4100;
7. Joplin—District 7—3901 East 32nd Street, PO Box 1445, Joplin, MO 64802, (417) 629-3300;
8. Springfield—District 8—3025 E. Kearney, PO Box 868, Springfield, MO 65801, (417) 895-7600;
9. Willow Springs—District 9—910 Springfield Road, PO Box 220, Willow Springs, MO 65793, (417) 469-3134; and
10. Sikeston—District 10—2675 North Main Street, PO Box 160, Sikeston, MO 63801, (573) 472-5333.

(I) All permits may be transmitted by facsimile machine, Internet, or electronic mail from the Motor Carrier Services Division located in Jefferson City only. Division facsimile transmission costs and telephone costs are included in the permit fee (see subsection (4)(E)). The following requirements and procedures apply:

1. For facsimile receiving, the equipment must be fully automatic which may require a dedicated telephone line with unattended operation capabilities; and
2. Proper arrangement for payment of permit fee must be made either by use of escrow accounts, which must be in effect prior to permit application request (see section (5)), or by payment of the fee at the time of application. Permits can only be amended by Motor Carrier Services Division's staff, as outlined under the circumstances in paragraph (4)(E)15.

(5) Escrow Accounts

(A) An escrow account may be established with the Missouri Department of Transportation. The following conditions govern the establishment and maintenance of escrow accounts:

1. An escrow account may be applied for by submitting an application supplying all the necessary information. Applications may be obtained from the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102, or established on-line;

2. Upon approval of application, the applicant will be assigned an account number that must be given with each transaction. The account holder is responsible for all charges filed against the account;

3. The account holder may replenish his/her escrow account at any time via phone, Internet, mail or in person; and

4. An escrow account will remain open as long as there is a positive or zero balance. Upon written request, an account may be closed and the unused balance will be refunded.

(B) It shall be the responsibility of the account holder to maintain records of the balance remaining in the account. In the event there is a difference between the account holder's records and the department's records, a letter stating the difference shall be the basis for review and adjustment. The department's decision shall be final.

(C) The escrow account is nontransferable and shall be used for payment only. The account shall be reduced by the amount for each item issued or processed.

Blanket Permits

Blanket Permits

(6) Annual Blanket Permits

Blanket permits may be issued for moves up to and including twelve feet four inches (12'4") in width and one hundred fifty feet zero inches (150'0") in overall length. Height and weight shall be in accordance with Chapter 304 of the Missouri Revised Statutes. The fee schedule for blanket permits is outlined in subsection (4)(E). Separate permits are required for each power unit. To qualify for an annual blanket permit, insurance must be in force for the entire period (see section (2)) and vehicles must be properly licensed. Annual blanket permits are issued only by the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102. All annual permits will expire at 12:00 a.m. on January 1 of the following year. Violation of a blanket permit shall be cause for revocation of the current blanket permit and may result in loss of the privilege of obtaining future blanket permits. Blanket permit moves shall be made in accordance with all other regulations and requirements. The permittee is required to obtain current travel restrictions prior to movement with blanket permits.

(A) These permits authorize travel over the state highway system only. Movement from origin to destination must be by the most feasible direct route. All conditions, safety considerations, bridge loading and clearance postings shall be complied with. The permittee shall properly warn traffic, adjust speed, and if necessary, stop traffic when crossing bridges where the load exceeds one-half (1/2) the roadway width of the bridge. Travel over structures on which load limits are posted for lesser weights is not allowed. Permittees traveling on interstate highways shall maintain the posted minimum speed.

(B) Single Commodity.

1. Manufactured and sectional home units. Annual blanket permits are available for the movement of manufactured and sectional home units up to and including twelve feet four inches (12'4") in width and one hundred fifty feet (150') in overall length. Height and weight shall be legal.

2. Farm products (hay). Annual blanket permits are available for farm products (hay) up to and including twelve feet for inches (12'4") in width. All other sizes and weight shall be legal. Farm products (hay) will not be required to comply with the reducible load requirement for width.

3. Farm implements and construction equipment. Annual blanket permits are available for these moves up to and including twelve feet four inches (12'4") in width and/or overall length up to a maximum of one hundred fifty feet (150'). Height and weight shall be legal. Farm implements or equipment not designed for towing at highway speeds must be hauled. If the equipment is designed to be towed, it shall

meet all regulatory safety requirements. Farm [products (hay) and] equipment with dual tires will not be required to comply with the reducible load requirement for width.

4. One hundred (100)-mile radius blanket for farmers and farm implement dealers. Annual blanket permits are available to farm implement dealers and farmers for movement of farm implements up to and including fourteen feet six inches (14'6") in width. All other dimensions and weight shall be legal. This blanket is only valid for moves within a one hundred (100) mile radius of permittee's principal place of business. All other permit regulations, including but not limited to times of travel, signing and escorts) will apply. Farm implements not designed for towing at highway speeds must be hauled. If the equipment is designed to be towed, it shall meet all regulatory safety requirements.

5. Implements of husbandry and transporting vehicle. Annual blanket permits are available for movement up to and including twelve feet four inches (12'4") in width. All other dimensions and weight shall be legal. Implements of husbandry are machines designed specifically for the application of commercial plant-food materials or agricultural chemicals and off-road usage. Such units shall not operate under their own power on the interstate system.

6. Repeated moves of like objects. Annual blanket permits for the movement of specific nonreducible commodities may be issued to a maximum width of twelve feet four inches (12'4") and/or overall length up to a maximum of one hundred fifty feet (150'). Height and weight shall be legal. The following items may be considered: boats, portable buildings, wood trusses, steel trusses, plates, beams, angles, pipe or piling, reinforcing steel mesh, rods or bars, tanks, mobile office trailers, grain carts, cotton trailers, park trailers, precast concrete panels, aluminum plates, wood beams and concrete girders. The permit will describe and specify the object to be hauled. A blanket permit may be issued for the repeated movement of objects for permanent use in their transported form. Such objects may vary in size as long as the largest is within the width and/or length limit specified on the permit. Multi-piece loads must be nonreducible and nondivisible in dimension.

(C) Multiple Commodity. Annual blanket permits are available to haul any commodity up to and including twelve feet four inches (12'4") wide and one hundred fifty feet (150') overall length. Height and weight shall be legal. **MULTIPIECE LOADS SHALL BE NONREDUCIBLE AND NONDIVISIBLE.**

(D) Blanket permits are also available for items that may be oversized or overweight with varying operation areas and time periods. These blanket permits may be issued as explained in the following paragraphs:

1. Thirty (30)-day blanket. Blanket permits up to and including twelve feet four inches (12'4") wide and/or overall length up to and including one hundred fifty feet (150') covering specified travel over listed routes may be issued for a period not exceeding thirty (30) days to expedite construction or repair of public utilities or public works clearly in the public interest. Height must be legal;

2. Well-drilling blanket. Blanket permits for well-drilling rigs may be issued to a maximum width of twelve feet four inches (12'4"), and/or overlength to a maximum of sixty feet (60') for single units and weights not to exceed twenty thousand (20,000) pounds or legal weight on a single axle, forty thousand (40,000) pounds on a tandem axle group or sixty thousand (60,000) pounds on a triple or quadrum axle group and a gross weight not to exceed the maximum allowable gross weight according to the number of axles and the specified axle spacings as shown on the weight table in subsection (11)(G). Equipment classified for use in well-drilling work is a single unit designed primarily to drill wells. The unit shall be reduced in size as much as practical. Drill bits and other necessary drilling tools may be carried with the drill rig provided the permitted axle and gross vehicle weight are not exceeded. The permit authorizes travel over the state highway system only and the unit must be able to maintain the posted minimum speed on the interstate system. Travel over bridge structures on which a load limit is posted for lesser weights is not allowed;

3. Emergency response blanket. Annual blanket permits for the initial response and direct return from an emergency are available up to and including twelve feet four inches (12'4") in width, one hundred fifty feet (150') in length and maximum axle weights and gross weight as allowed in section (11). Height shall be legal. This permit authorizes travel over the state highway system only. Travel over bridge structures on which a load limit is posted for lesser weight is not allowed. The restriction prohibiting travel in tourist areas, during curfew hours, at night and on holidays or holiday weekend periods will be waived for the initial response to the emergency site. Clearance lights in lieu of flags and reflectorized oversized load signs are required for night travel. See section (12) for additional procedures for emergency travel;

4. Public utility. Blanket overlength permits not exceeding one hundred fifty feet (150') in length (width, height and weight must be legal) may be issued to a public utility company, a public agency or their contractor to transport poles or pipe for minor construction, reconstruction, replacements or emergency repairs. Such permits shall be issued for each power unit to travel from the nearest available pole or pipe storage yard. The restriction prohibiting travel in tourist areas, during curfew hours, at night and on holidays or holiday weekend periods is waived for emergency repairs. Clearance lights in lieu of flags and reflectorized oversize load signs are required for night travel (see subsection (12)(J));

5. Sludge disposal units. Blanket permits are available for travel on the state highway system other than the interstate and shall not exceed eleven feet six inches (11'6") in width. All other dimensions and weight shall be legal;

6. Concrete pump truck blanket. Blanket permits for concrete pump trucks may be issued to a maximum width of twelve feet four inches (12'4"), and/or overlength to a maximum of sixty feet (60') for single units and weights not to exceed twenty thousand (20,000) pounds or legal weight on a single axle, forty thousand (40,000) pounds on a tandem axle group or sixty thousand (60,000) pounds on a triple or quadrum axle group and a gross weight not to exceed the maximum allowable gross weight according to the number of axles and the specified axle spacings as shown on the weight table in subsection (11)(G). This permit authorizes travel over the state highway system only and the vehicle must be able to maintain the posted minimum speed on the interstate system. Travel over bridge structures on which a load limit is posted for lesser weights is not allowed.

7. Projects. Blanket permits are available for the movement and/or operation of oversize and overweight road-building equipment within the limits of a specific highway project or combination of projects, for a period not to exceed the completion date of that project. The permittee shall coordinate movement and/or operation necessity and procedures with the project engineer and collectively submit a permit application containing all pertinent information to include any special or unusual circumstances with a recommendation to the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102;

8. Longer combination vehicles (LCV) blanket permits. This permit may include combinations defined as Rocky Mountain Doubles (RMD), Turnpike Doubles (TPD), and triple-trailers currently allowed to operate on turnpikes in other states. Annual blanket permits are available for longer combination vehicles up to one hundred twenty feet (120') in overall length to travel to and from locations within twenty (20) miles of the western border of this state. One hundred twenty thousand (120,000) lbs. is allowed for LCVs entering from the Kansas border. Ninety five thousand (95,000) lbs. is allowed for LCVs entering from the Nebraska border and ninety thousand (90,000) lbs. is allowed for LCVs entering from the Oklahoma border. All other dimensions shall be legal. This permit authorizes travel over specified routes on the state highway system, and

9. Government agency. Annual blanket permits are available for government agencies up to and including twelve feet four inches (12'4") in width, one hundred fifty feet (150') in length and maximum axle weights and gross weight as allowed in section (11). Height shall be legal.

(7) Crossing Permits and Commercial Zone Bridge Analysis.

(A) Highway crossing. A single day permit is available to allow off-road machinery to be transported or driven across a state maintained highway in order to access adjacent properties. Size and weight limitations will be based on physical restrictions at the location of the crossing; and

(B) Commercial Zone Bridge Analysis. A bridge analysis is available for loads moving under legal commercial zone weight limits that are too heavy to cross a posted structure. Applications must include information as outlined in section (4)(D).

Escort Requirments

Escort Requirements

(8) Civilian Escorts and Flaggers. It is the responsibility of the permittee to see that escorts which accompany their moves adhere to these regulations in addition to the regulations specifying when escorts and flaggers are required, as listed in sections (9), (13), (14), (15) and (16).

(A) An "escort" is defined as a vehicle with operator, which accompanies oversize moves to serve as a warning to other traffic that extra caution is required. Operators of escort vehicles shall be properly licensed, obey all traffic laws, and be at least eighteen (18) years of age.

(B) The escort vehicle must be a properly licensed single unit vehicle of standard size with unobstructed vision to the front and rear and in safe operating condition. The unit may be an automobile, pickup truck, utility vehicle, station wagon, or equivalent.

(C) It is the responsibility of the permittee to ensure the escort's minimum financial responsibility as required by law is in force at all times.

(D) Oversize load signs shall be displayed on the front and/or rear of the escort vehicle, whichever is applicable for the move. A sign mounted on the top of the vehicle with printing on both sides is acceptable. Signs are to be a minimum size of five feet (5') long by one foot (1') high with minimum eight inch (8") high letters. The sign's background shall be yellow with black lettering and visible for at least three hundred feet (300'). The legend shall read "OVERSIZE LOAD."

(E) Escort vehicles are to be equipped with at least two (2) red or orange fluorescent warning flags mounted on a staff at the two (2) front extremities of the vehicle for a front escort and at the rear extremities for a rear escort. The escort vehicle for overheight loads (see paragraph (9)(H)3[.]) shall have a vertical clearance detection device and have continuous, uninterrupted, two-way communication with the power unit. Flags used for flagging and on permit vehicles shall be clean, red or orange fluorescent, in good condition, with no advertising or wording and be at least eighteen inches (18") square.

(F) Flaggers are required as outlined in subsection (9)(J). Flaggers shall have proper training in directing traffic.

(9) Regulations for All Permits. The following regulations apply to all movements of oversize and/or overweight loads except as stipulated in sections (6), (11), (12), (13), (14), (15) and (16):

(A) The permit must accompany the move until the move is completed;

(B) Travel is limited to one-half (1/2) hour before sunrise to one-half (1/2) hour after sunset, except as permitted in subsection (9)(E) of this rule and sections (6), (11), (12), (13), (14) and (15). No movement is allowed when road conditions are hazardous, such as snow and ice covered or when hazardous cross winds affect the movement or when weather conditions are such to limit the visibility to less than five hundred feet (500');

(C) No movement is allowed during specified holiday periods listed in paragraph (1)(l);

(D) No movement is allowed on Saturdays and Sundays in the Lake of the Ozarks and Branson areas as follows:

1. Lake of the Ozarks area—the following restrictions apply May 25 through Labor Day (first Monday in September):

A. Route 54—between the junctions with Route V in Miller County and Route Y in Camden County.

B. Route 5—between the junction with Route 54 and the City limits of Gravois Mills.

C. Route 42—between the junctions with Routes 54 and 134.

D. Business 54—between the east and west junctions with Route 54;

2. Branson area—the following restrictions apply May 1 through November 30:

A. Route 76—between the junctions with Routes 13 and 160.

B. Route 13—between the city limits of Branson West and the junction with Route 86 west; and

(E) For safety and to reduce traffic congestion, Monday through Friday travel in the metropolitan areas of St. Louis, St. Charles, Kansas City, and Springfield is restricted as follows (The metropolitan area curfews indicated in subsection (9)(E) do not apply to loads that are overweight only):

1. All routes in St. Louis City and County, with the exception of Route 370, are restricted between the hours of 6:30 a.m. to 9:00 a.m. and 3:30 p.m. to 6:30 p.m.;

2. St. Charles County on I-70, eastbound travel between the junction with Route 61 and the Missouri River Bridge is restricted from 6:30 a.m. to 9:00 a.m. and I-70 westbound between the Missouri River Bridge and the junction with Route 61 is restricted from 3:30 p.m. to 6:30 p.m.; Route 40/61 (I-64) (both directions) between the Missouri River Bridge and I-70 and Route 94 (both directions) between Route 370 and Route 40/61 (I-64) are restricted from 6:30 a.m. to 9:00 a.m. and 3:30 p.m. to 6:30 p.m.;

3. Jefferson County on I-55 (both directions) between the St. Louis County line and Route 67; Route 21 and Route 30 (both directions) between St. Louis County line and Route BB; Route 141 (both directions) between the St. Louis County line and Route 61/67 is restricted between the hours of 6:30 a.m. to 9:00 a.m. and 3:30 p.m. to 6:30 p.m.;

4. In the Kansas City area on the routes or inside of the area bounded by Routes 150, 291, I-470, 152 West, to I-435 (Platte County) exit 24 south to the Kansas state line, travel is restricted between the hours of 7:00 a.m. to 9:00 a.m. and 4:00 p.m. to 6:00 p.m.; and

5. Inside the city limits of Springfield, travel is restricted on all routes on the state highway system between the hours of 7:00 a.m. to 9:00 a.m. and 4:00 p.m. to 6:00 p.m., except:

A. I-44—Restricted between 4:00 p.m. and 6:00 p.m. only.

B. U.S. 60—Restricted between 4:00 p.m. and 6:00 p.m. only.

C. U.S. 65—Restricted between 7:00 a.m. and 9:00 a.m. and between 3:30 p.m. and 6:00 p.m. only.

(F) Movements of major equipment or other special loads for short distances with origin and destination within major urban areas may be permitted between the hours of 1:00 a.m. and 6:00 a.m. Monday through Friday, except for these time periods on and immediately following a holiday period and on Sunday from 1:00 a.m. to 12:00 noon, except where this time conflicts with a holiday period. Such movements must be pre-planned and all protection must be provided for the safety of the public as follows:

1. Required signing must be lighted or reflectorized. Amber lights at the extreme ends or projection of the load or vehicle must be provided in lieu of flags.

(G) Maximum speed for all moves shall be ten (10) miles per hour less than the posted speed limit unless otherwise specified on the permit. Movements over routes where minimum speed limits are posted shall operate at least at the minimum speed posted;

(H) Escort requirements are as follows:

1. Overwidth. No escort is required for loads up to and including twelve feet four inches (12'4") in width. Escort requirements for loads exceeding twelve feet four inches (12'4") in width are in sections (13), (14), (15) and (16);

2. Overlength. A rear escort is required for movements when the vehicle and load exceed ninety feet (90') for a combination unit on all highways except divided highways and as required in sections (12), (15) and (16);

3. Overheight. A height detection vehicle is required to precede overheight loads exceeding fifteen feet six inches (15'6"). The height detection vehicle shall have a vertical clearance detection device and have direct, continuous, uninterrupted, two-way communication with the power unit; and

4. A separate escort shall be provided for each load and each dimension. Travel in convoy is not allowed. Additional and/or special escort requirements may be specified whenever the size, speed or operation of movement might require.

(I) Front escorts shall travel approximately three hundred feet (300') in front of the load and rear escorts approximately three hundred feet (300') to the rear of the load. In heavy traffic or when traveling within cities or towns, the escort vehicle should maintain a distance consistent with existing traffic conditions; and

(J) Flagging is required whenever the dimensions of overwidth loads are equal to or exceed the width of the traveled lane on two (2)-lane bridges or whenever the movement is of such width or length that it infringes on the adjacent lane of traffic. The operator of the escort vehicle may act as the flagger. On shorter bridges it may not be necessary to actually stop traffic if sight distance is good, but on longer bridges or where sight distance is short, a flagger shall be used to direct traffic and be prepared to stop traffic if necessary. A flagger is also required if the permitted vehicle and load must stop due to a breakdown with all or part infringing on the traveled roadway. Additional traffic control may be required for large complex moves. All traffic control devices shall meet the requirements listed in the Manual on Uniform Traffic Control Devices (MUTCD) published by the Federal Highway Administration (FHWA).

(10) Regulations for Oversize Permits. In addition to the regulations in sections (7), (9), (13), (14), (15) and (16); the following applies to all oversize permits:

(A) Red or orange fluorescent flags in good condition with a minimum size of eighteen inches (18") square shall be displayed at the extreme ends or projections of all overwidth and overlength loads, and all four (4) corners of manufactured and sectional home units. Oversize load signs at least seven feet (7') long by eighteen inches (18") high with ten-inch (10") letters of one and five-eighths inch (1 5/8") stroke shall be displayed front and rear for loads exceeding ten feet six inches (10'6") in width on all highways. When the overall length of a combination unit exceeds ninety feet (90') or the overall length of a single unit exceeds fifty feet (50'), an oversize load sign is required on the rear of the load. The sign's background shall be yellow with black lettering. The legend for these signs shall read "OVERSIZE LOAD."

(B) The following Missouri and Mississippi River bridges may be used for the movement of loads in excess of ten feet six inches (10'6") in width. If the load exceeds one-half (1/2) the width of the roadway on the two (2)-lane bridges, a flagger shall be used to stop all oncoming traffic at the far end of the structure before the vehicle and load can proceed across. No movement will be allowed where flagging is necessary between the hours of 6:30 to 9:00 a.m. and 3:00 to 6:00 p.m.

(C) Permit movements on Mississippi River, Missouri River, and Lake of the Ozarks bridges are permanently restricted as designated on the following page.

No overweight or oversize permit movement on the following Mississippi River Bridges:

Location	Route
St. Louis City (Poplar Street)	I-70/I-55/I-64
St. Louis City (MLK)	MO 799
Cairo, IL	U.S. 60/U.S. 62

No overweight permit movement on the following Missouri River Bridges:

Location	Route
Miami	MO 41
Glasgow	MO 240
Washington	MO47

No overweight permit movement on the following Lake of the Ozarks Bridge:

Location	Route
Hurricane Deck	MO 5

(D) Overlength permits shall be limited to a nonreducible vehicle and load with an overall length for a single unit not exceeding sixty feet (60') and for combination units not exceeding one hundred fifty feet (150'). Steering mechanisms may be required on rear axles of combination units.

(E) Overheight permits for all movements will be limited to a nonreducible combination of vehicle and load height not exceeding the vertical clearance of the structures on the most feasible direct route between origin and destination. Arrangements for the raising or removal of overhead lines will be the responsibility of the permittee. It is also the responsibility of the permittee to check all structures and overhead wires for clearances before movement.

(F) The movement of noncommercial buildings exceeding routine special permit dimension limitations will be determined on an individual basis dependent on building size, roadway and structure width and clearances, traffic volumes and other applicable factors. Permits for movement of such buildings shall be issued by the district offices (see section (16)).

(G) Movement of farm products (hay) up to, but not exceeding, fourteen feet (14') in width will be allowed by permit. These movements must comply with all existing Missouri oversize and overweight permit regulations except reference to reducible loads in subsection (1)(B) shall not apply. The hauling unit must be properly insured and licensed.

(H) Night movement for hauling hay up to fourteen feet (14') in width will be allowed by single trip permit. This movement will require a front and a rear escort on all two (2)-lane and multi-lane undivided highways. A rear escort is required on interstate and other dual lane divided highways. Oversize load signs are required and shall be lighted or reflectorized. Clearance lights in lieu of flags shall be mounted at extreme ends or load projections when moving after daylight hours and/or when visibility is less than five hundred feet (500'). Continuous, uninterrupted two-way communication is required between the power unit and all escort vehicles. Movement is restricted for urban and tourist areas as outlined in subsections (9)(D) and (9)(E). Movement is restricted for holiday periods as outlined in subsection (1)(I).

(11) Regulations for Routine Overweight Permits. The following regulations apply to permit moves to transport nonreducible and nondivisible loads. See section (15) for super heavy and large load movement:

(A) Overweight permits may specify maximum and minimum speeds and method of vehicle operation to reduce hazards or control impact factors and load distribution on pavements and bridges. Overweight loads not oversize and not exceeding the gross weight limit as listed in subsection (11)(D) will be granted day and night movement except travel during holiday and holiday weekend periods as listed in subsection (1)(I) and except for movement in tourist areas listed in subsection (9)(D). All movements authorized under overweight permits will be over specified routes on the state highway system only;

(B) Axles included in booster axle, tandem axle, triple axle, or quadrum axle groups on all hauling units shall be equipped with dual wheels or equivalent tread width. When configuring trailers for hauling units with seven (7) or more axles, conventional axles, or booster axles may be used for the addition of the single axle, tandem axle, or triple axle groups that may be placed at the end of the trailer. Definitions—

1. The term “axle” shall mean a common axis of rotation of one or more wheels whether power-driven or freely rotating, and regardless of the number of wheels carried thereon;

2. The term “axle group” shall mean an assembly of two (2) or more consecutive axles considered together in determining their combined load effect on pavement or structures. Axle groups must have a common equalization system, which will equalize the load between or among axles in both static and dynamic conditions. Any combination of mechanically equalized axles with either air suspension or any other suspension system used to form axle groups is not allowed;

3. The term “spread axles” shall mean two (2) axles, which are more than ninety-six inches (96") apart and are considered single axles;

4. The term “tandem axle” shall mean a group of two (2) or more axles arranged one behind another, where the distance between the extreme centers is more than forty inches (40") and not more than ninety-six inches (96") apart;

5. The term “triple axle or tridem” shall mean a group of three (3) axles, which are fully equalized automatically or mechanically and the distance between the centers of the extreme is more than ninety-six inches (96") and not more than one hundred forty-four inches (144");

6. The term “quadrum axle” shall mean a group of four (4) axles, which are fully equalized automatically or mechanically, the distance between each of the four (4) axles is evenly spaced and the distance between the centers of the extreme is not more than one hundred ninety-two inches (192");

7. The term “lift axle” shall mean any axle designed with the capabilities of manipulation or adjustment of the weight on it or the axle group by use of manual valve(s). Under no circumstances will “lift axles” be recognized in weight computations. An additional axle may be added to an existing axle group provided—

- A. All axles have a common equalization system;
- B. All equalization is accomplished with automatic valves; and
- C. Axle lifting mechanism is located outside the cab, not readily accessible to driver; and

8. The term “booster axle” shall mean an extension of a hauling unit, which when attached to the trailer adds a single axle, tandem, or triple axle group. To be acceptable, a booster axle must connect to the vehicle frame in such a manner as to equalize the load between axles;

(C) The allowable combination configurations for overweight special permits are as follows:

5-Axle Configurations

Single-Tandem-Tandem (1-2-2)

Single-Tandem-Spread (1-2-2)

Minimum distance between the centers of the first and last axles is fifty-one feet (51').

Maximum gross weight allowed on a 5-axle configuration is one hundred four thousand (104,000) pounds.

6-Axle Configurations

Single-Tandem-Triple (1-2-3)

Single-Triple-Tandem (1-3-2)

Minimum distance between the centers of the first and last axle is fifty-one feet (51').

Maximum gross weight allowed on a 6-axle configuration is one hundred twenty thousand pounds (120,000).

Configuration lengths from forty-three feet (43') up to fifty-one feet (51') will be allowed provided that the maximum gross weight on these configurations does not exceed one hundred twelve thousand pounds (112,000). When the configuration length is less than fifty-one feet (51'), the maximum gross weight on any tandem axle grouping shall be forty thousand pounds (40,000) and the maximum gross weight on any tridem axle grouping shall be sixty thousand pounds (60,000).

7-Axle Configurations

Single-Triple-Triple (1-3-3) (Routine Configuration)

Single-Tandem-Quad (1-2-4) (Alternative Configuration)

Single-Tandem-Triple-Single (1-2-3-1)

Single-Triple-Tandem-Single (1-3-2-1)

Single-Tandem-Tandem-Tandem (1-2-2-2)

Minimum distance between the centers of the first and last axles is fifty-five feet (55') for the routine configuration, seventy-five feet (75') for the alternative configuration, and sixty-nine feet (69') for all other configurations.

The following axle group spacing limitation will apply to all of the configurations as shown above, but will not apply to the steering axle. A minimum distance of fourteen feet (14') shall be required between centers of adjacent axles on consecutive tandem, triple, and quad axle groupings and on single axles used in combination with these groupings.

Maximum gross weight allowed on a 7-axle configuration is one hundred thirty thousand (130,000) pounds for the alternative configuration, one hundred thirty-two thousand (132,000) pounds for the routine configuration, one hundred thirty-eight thousand (138,000) pounds for the 1-2-3-1 and 1-3-2-1 configurations, and one hundred fifty thousand (150,000) pounds for the 1-2-2-2 configuration[s].

8-Axle Configurations

Single-Triple-Quad (1-3-4) (Routine Configuration)

Single-Tandem-Tandem-Triple (1-2-2-3)

Single-Triple-Triple-Single (1-3-3-1)

Single-Triple-Tandem-Tandem (1-3-2-2)

Single-Tandem-Triple-Tandem (1-2-3-2)

Minimum distance between the centers of the first and last axle is sixty-one feet (61') for the routine configuration and seventy-five feet (75') for all other configurations.

The following axle group spacing limitation will apply to all of the configurations as shown above, but will not apply to the steering axle. A minimum distance of fourteen feet (14') shall be required between centers of adjacent axles on consecutive tandem, triple, and quad axle groupings and on single axles used in combination with these groupings.

Maximum gross weight allowed on an 8-axle configuration is one hundred forty-four thousand (144,000) pounds for the routine configuration, and one hundred sixty thousand (160,000) pounds for all other configurations.

9-Axle Configurations

Single-Triple-Tandem-Triple (1-3-2-3) (Routine Configuration)

Single-Quad-Quad (1-4-4) (Alternative Configuration)

Single-Tandem-Triple-Triple (1-2-3-3)

Single-Triple-Quad-Single (1-3-4-1)

Single-Triple-Triple-Tandem (1-3-3-2)

Single-Tandem-Tandem-Tandem-Tandem (1-2-2-2-2)

Minimum distance between the centers of the first and last axle is seventy-five feet (75') for all configurations. The following axle group spacing limitation will apply to all of the configurations as shown above except for the alternative configuration, but will not apply to the steering axle. A minimum of fourteen feet (14') shall be required between centers of adjacent axles on consecutive tandem, triple, and quad axle groupings and on single axles used in combination with these groupings. When the alternative configuration is used, a minimum distance of thirty feet (30') shall be required between centers of adjacent axles on the consecutive quad axle groupings.

Maximum gross weight allowed on a 9-axle configuration is one hundred fifty-six thousand (156,000) pounds for the alternative configuration and one hundred sixty thousand (160,000) pounds for all other configurations.

10-Axle Configurations

Single-Triple-Triple-Triple (1-3-3-3) (Routine Configuration)

Single-Tandem-Tandem-Tandem-Triple (1-2-2-2-3)

Single-Triple-Tandem-Tandem-Tandem (1-3-2-2-2)

Single-Tandem-Triple-Tandem-Tandem (1-2-3-2-2)

Single-Tandem-Tandem-Triple-Tandem (1-2-2-3-2)

The minimum distance between the centers of the first and last axle is eighty-five feet (85') for all configurations.

The following axle group spacing limitation will apply to all of the configurations as shown above except for the routine configuration, but will not apply to the steering axle.

A minimum of fourteen feet (14') shall be required between centers of adjacent axles on consecutive tandem and triple axle groupings.

When the routine configuration is used, a minimum distance of twenty feet (20') shall be required between centers of adjacent axles on the consecutive triple axle groupings.

When possible, the distribution of the loading to the various axle groupings should be done in a manner to equalize the loadings to all of the axles on the entire configuration. When full equalization between the axles on the configuration is not possible, the gross weight variation between the individual axles (excluding the steering axle) on the entire configuration shall not be more than twenty-five percent (25%).

The maximum gross weight allowed on a 10-axle configuration is one hundred sixty thousand (160,000) pounds.

11-Axle Configurations

Single-Tandem-Tandem-Triple-Triple (1-2-2-3-3)

Single-Tandem-Triple-Tandem-Triple (1-2-3-2-3)

Single-Triple-Tandem-Tandem-Triple (1-3-2-2-3)

Single-Triple-Triple-Tandem-Tandem (1-3-3-2-2)

Single-Triple-Tandem-Triple-Tandem (1-3-2-3-2)

Single-Tandem-Triple-Triple-Tandem (1-2-3-3-2)

The minimum distance between the centers of the first and last axle is eighty-five feet (85') for all configurations.

The following axle group spacing limitation will apply to all of the configurations as shown above, but will not apply to the steering axle. A minimum distance of fourteen feet (14') shall be required between centers of adjacent axles on consecutive tandem and triple axle groupings.

When possible, the distribution of the loading to the various axle groupings should be done in a manner to equalize the loadings to all of the axles on the entire configuration.

When full equalization between the axles on the configuration is not possible, the gross weight variation between the individual axles (excluding the steering axle) on the entire configuration shall not be more than twenty-five percent (25%).

The maximum gross weight allowed on an 11-axle configuration is one hundred sixty thousand (160,000) pounds.

12-Axle Configurations

Single-Tandem-Triple-Triple-Triple (1-2-3-3-3)

Single-Triple-Tandem-Triple-Triple (1-3-2-3-3)

Single-Triple-Triple-Tandem-Triple (1-3-3-2-3)

Single-Triple-Triple-Triple-Tandem (1-3-3-3-2)

The minimum distance between the centers of the first and last axle is eighty-five feet (85') for all configurations.

The following axle group spacing limitation will apply to all of the configurations as shown above, but will not apply to the steering axle. A minimum distance of fourteen feet (14') shall be required between centers of adjacent axles on consecutive tandem and triple axle groupings.

When possible, the distribution of the loading to the various axle groupings should be done in a manner to equalize the loadings to all of the axles on the configuration.

When full equalization between the axles on the configuration is not possible, the gross weight variation between the individual axles (excluding the steering axle) on the entire configuration shall not be more than twenty-five percent (25%).

continued on next page

The maximum gross weight allowed on a 12-axle configuration is one hundred sixty thousand (160,000) pounds.

(D) The maximum allowable axle weights for permits are as follows:

1. Single axle—twenty thousand (20,000) pounds;
2. Tandem axle group—forty-six thousand (46,000) pounds, but not more than twenty-four thousand (24,000) pounds for any axle of a multi-axle group;
3. Triple axle group—sixty thousand (60,000) pounds, but not more than twenty-one thousand (21,000) pounds for any axle of a multi-axle group;
4. Quadrum axle group—seventy-two thousand (72,000) pounds, but not more than nineteen thousand (19,000) pounds for any axle of a quadrum axle group; and

(E) Prior to issuing an overweight permit, the equalization system of the axle groups on the power unit and the trailer must be accepted by the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102. Detailed schematic drawings may be requested. It shall be the responsibility of the applicant to contact the Motor Carrier Services Division for approval or disapproval;

(F) When it is necessary to move specialized equipment, such as mobile cranes, rock crushers, drilling equipment, or other equipment which cannot be reasonably reduced in weight to comply with legal weights, consideration shall be given for a special permit for these moves. The applicant must first give assurance that the unit has been reasonably reduced in weight and dimension (exclusive of attachments that are an intricate part necessary for the operation of the machine and/or machine adjustments necessary for weight distribution). After the weight has been reduced to a reasonable minimum, a special permit may be issued for weights not to exceed twenty thousand (20,000) pounds or legal weight on a single axle, forty thousand (40,000) pounds on a tandem axle, sixty thousand (60,000) pounds on a triple axle group, or sixty thousand (60,000) pounds on a quadrum axle group. Axle and axle groups are defined in subsection (11)(C); and

(G) The maximum allowable gross weight in pounds for specialized equipment shall be determined by the number of axles and the distance between the external axles as indicated in the following chart:

Gross Weight Table

Specialized Equipment 2, 3, 4, 5, 6 Axles

	Legal Wt.	Permit Max.	Legal Wt.	Permit Max.	Legal Wt.	Permit Max.	Legal Wt.	Permit Max.	Legal Wt.	Permit Max.

65				151,200		151,200
66				152,000		152,000

If the specialized equipment exceeds the:

1. Allowable weight on an axle or axle group;
 2. Gross weight for the number of axles; or
 3. Does not meet the required axle spacings for the number of axles;
- the permit request will be considered according to the rules of section (15).

(12) Procedures for Emergency Movements

(A) Railroad derailments and other civil disasters may create the necessity for an emergency movement by oversized /overweight vehicles.

(B) Emergency movements into or within the state may be allowed day or night, seven (7) days a week by verbal approval from either the motor carrier compliance supervisor or other designated motor carrier services representative.

(C) An official permit covering each emergency movement must be obtained on the first working day immediately following the move.

(D) Verbal authority for an emergency movement may be granted only after confirmation that an emergency exists by an authorized representative of the permittee who shall be required to furnish information on conditions at the location of the emergency and the name of the company to perform the emergency service.

(E) The Missouri Department of Transportation representative granting authority for an emergency movement will advise the Missouri State Highway Patrol that the move is authorized and furnish information on the vehicle involved, such as make and license of hauling units, axle weights, load dimensions, location, routes of travel, and the estimated time of the movement. The restriction prohibiting travel in tourist areas, during curfew hours, at night and on holidays or holiday weekend periods will be waived for the initial response to the emergency site.

(F) Permits for return trips will be issued during regular working hours only and each unit must comply with the permit regulations' limitations for weight and dimensions.

(G) Emergency movements are not exempt and will not be waived of the requirement to stop at weigh stations.

(H) Violations are not in the interest of public safety and any misrepresentation in the application, verbal request for a permit, or violation of the terms of the verbal authority for movement may result in denial of future authorizations being granted for an emergency move.

(I) Escort vehicles shall travel approximately three hundred feet (300') in front on two (2)-lane pavement or approximately three hundred feet (300') in rear on dual lane or multi-lane undivided pavement. Escort vehicles shall use clearance lights in lieu of flags and reflectorized oversized load signs are required for travel at night or when visibility is less than five hundred feet (500'). Escort vehicles will not be allowed to convoy movements.

(J) In addition to the special provisions contained herein, the permittee shall use clearance lights in lieu of flags at the extreme edges of an overwidth load and reflectorized oversized load signs mounted on

the front and rear of the vehicle and load when visibility is less than five hundred feet (500') and shall observe all other Missouri oversize and overweight permit regulations.

(K) The permittee shall be responsible for any damage to the roadway surface, shoulders, bridge structures, or other highway facilities resulting from operations authorized pursuant to this section.

(L) Blanket permits for emergency movements, if authorized, in lieu of verbal procedure, require special procedures in addition to those previously mentioned (see section (6)).

1. Such blanket permits will be valid only for the initial response to an emergency and the return trip from that emergency. Movement for purposes other than to or from an emergency response will require a single trip permit be obtained during regular working hours and must comply with the permit regulations' limitations for weight and dimensions.

(13) Regulations for the movement of loads over twelve feet four inches (12'4") to fourteen feet (14') wide. The following requirements in addition to the requirements of oversize and overweight permit regulations for movement of loads up to twelve feet four inches (12'4") in width shall apply to all loads over twelve feet four inches (12'4") to fourteen feet (14') in overall width.

(A) Restrictions and Requirements. Bridge crossings may require stopping traffic on two (2)-lane highways where bridge width is less than twenty-eight feet (28'); a distance of at least one thousand feet (1,000') between oversize vehicles is required; escorts may act as flaggers.

1. Travel on interstate and other divided highways allowed from one-half (1/2) hour before sunrise to one-half (1/2) hour after sunset except where restricted in tourist and urban areas (see subsections (9)(D) and (9)(E)) and as prohibited by holiday restrictions in subsection (1)(I).

2. No movement Monday through Friday from 6:30 a.m. to 9:00 a.m. and 3:30 p.m. to 6:00 p.m. on all other routes on the state highway system and no movement allowed on Saturday and Sunday in tourist areas (see subsection (9)(D)).

(B) Escort Requirements. One (1) escort is required for each oversize unit on the interstate and designated route system. This escort shall be in the rear on dual-lane, divided, or multi-lane pavement and in the front on two (2)-lane pavement. Travel on routes off interstate and designated route system will require two (2) escorts (one (1) front and one (1) rear). Continuous, uninterrupted two-way communication is required between the power unit and all escort vehicles.

(C) All permits will be one (1)-way single trip.

(14) Regulations for the movement of loads over fourteen feet (14') to sixteen feet (16') overall width. The following requirements, in addition to the requirements of oversize and overweight permit regulations for movement of loads up to twelve feet four inches (12'4") in width, shall apply to the movement of allowed loads. Farm products (hay) shall not exceed fourteen feet (14') in width.

(A) Routes over which these loads will be considered are highways with pavement at least twenty-four feet (24') wide with at least four foot (4') shoulders and travel on routes of lesser width shall be for the shortest practical distance to complete the move, unless traffic volume, roadway alignment, and/or other circumstances justify alternate routing.

1. Travel on interstate and other divided highways allowed from one-half (1/2) hour before sunrise to one-half (1/2) hour after sunset, except where restricted in tourist and urban areas (see subsections (9)(D) and (E)); and movement is limited to Monday through Friday except as prohibited by holiday restrictions (see subsection (1)(I)).

2. Movement is further restricted from 6:30 a.m. to 9:00 a.m. and 3:30 p.m. to 6:00 p.m. on all other routes on the state highway system.

(B) Escort Requirements. One (1) escort is required in the rear on interstate and other divided highways. Two (2) escorts are required on all multi-lane undivided and two (2)-lane highways, one (1) front and one (1) rear. Continuous, uninterrupted two-way communication is required between the power unit and all escort vehicles.

(C) Additional Restrictions and Requirements.

1. No movement on two (2)-lane highways when dirt shoulders are wet.

2. Bridge crossing may require stopping traffic on two (2)-lane highways where bridge width is less than thirty-two feet (32'). A distance of at least one thousand feet (1,000') between oversize vehicles is required; escorts may act as flaggers.

(D) All permits will be one (1)-way single trip.

A grayscale photograph of a large truck carrying a massive load of steel beams on a highway. The truck is viewed from the front, and the load is stacked high, extending beyond the top of the frame. The truck's front grille and headlights are visible. A sign on the front of the truck reads "OVERSIZE LOAD". Above the truck, a road sign also reads "OVERSIZE LOAD". The background shows other vehicles on the highway and a curved road ahead.

Superloads

Superloads

(15) Super Heavy and Large Load Movement. Loads in excess of routine permit limits will be considered according to the following regulations when air, rail, or water terminal points are not available: (A) All permit applications with dimensions or weights exceeding the routine limits of the preceding oversize and overweight permit rule (generally in excess of sixteen feet (16') wide, sixteen feet (16') high, one hundred fifty feet (150') long and/or over one hundred sixty thousand (160,000) pounds gross weight) shall be submitted by fax or online, along with proof of insurance. Valid vehicle registration may be required, as well as minimum of \$425 in escrow (to cover the cost of a bridge analysis) before an application can be processed. Applications for this type of move are available on request or online. The applicant should allow at least two (2) weeks for a route evaluation. If any problems exist that may prevent the move from reaching its destination over the state highway system, the application will not be approved.

(B) The applicant may be required to provide a traffic control plan, sketches, or additional information for complex moves. One (1) lane for oncoming traffic must be open and clear for two (2)-lane highways and one (1) lane for both oncoming and following traffic must be open on four (4)-lane highways. If open lanes cannot be provided, a detour may be proposed.

(C) If the loaded height exceeds seventeen feet (17'), the applicant shall provide a written document from the appropriate utility company indicating approval to disturb aerial lines across the route.

(D) If the gross vehicle weight exceeds 350,000 lbs., an additional power unit must accompany the load and will be considered part of the vehicle configuration when conducting roadway and bridge structure analyses. For moves limited in length, this requirement may be waived at the discretion of Motor Carrier Services.

(E) If it is necessary to adjust, modify, or remove state owned property such as signal and sign mast arms, flashers, signs, etc., a qualified contractor approved by the Missouri Department of Transportation shall be hired by the applicant to perform the necessary adjustment or removal and replacement.

(F) Restrictions and Requirements.

1. Travel on interstate and other divided highways allowed from one-half (1/2) hour before sunrise to one-half (1/2) hour after sunset except where restricted in tourist and urban areas (see subsections (9)(D) and (9)(E)) and as prohibited by holiday restrictions in subsection (1)(I).

2. No movement from 6:30 a.m. to 9:00 a.m. and 3:30 p.m. to 6:00 p.m. on all other routes on the state highway system.

3. Travel is allowed on Saturday and Sunday for moves fourteen feet (14') wide and less except movement may be restricted for loads that are required to travel over a bridge structure at crawl speed, and no movement is allowed on Saturday and Sunday in tourist areas (see subsection (9)(D)).

4. Unless otherwise stated on the permit, dates and times of travel will be determined by the Missouri State Highway Patrol if the load requires their escort services.

(G) Escort Requirements. If Missouri State Highway Patrol escorts are required for a continuous portion of the move but not the entire move, they are only required for that portion. If the patrol escort is required for an intermittent portion of the move, they will be required to escort the entire move. In addition to escort requirements as outlined in subsection (9)(I), the following requirements apply to super heavy and large load movements:

1. One (1) front and one (1) rear civilian escort is required for all superloads, except;

2. If a load is required to cross bridge structures at crawl speed in the Kansas City and St. Louis areas then, one (1) front and two (2) rear civilian escorts are required for that portion of the move;

3. One (1) front and two (2) rear civilian escorts are required on all sections of dual lane highways traversed if load exceeds sixteen feet (16') wide and Missouri State Highway Patrol escorts are not present. If Missouri State Highway Patrol escorts are present, one (1) front and (1) rear civilian escort is required. In addition to the civilian escorts required above;

4. Missouri State Highway Patrol escorts are required when load exceeds:

A. Sixteen feet (16') wide on any highway other than interstate or MO370;

B. Eighteen feet (18') wide on interstate or MO370;

C. One hundred fifty feet (150') overall length on any highway;

D. Seventeen feet (17') high on any highway;

E. Any time deemed necessary due to complexity of route or load.

The Missouri State Highway Patrol will conduct a Level I inspection prior to performing escort services. Motor Carrier Services may, at their discretion, allow the substitution of local law enforcement in the place of Missouri State Highway patrol escorts for moves that are limited in length.

(H) All future permitting authority for a carrier may be revoked if the Missouri State Highway Patrol is not reimbursed for superload escorting services.

(I) Generally the maximum weight allowed on any single axle shall be twenty-two thousand four hundred (22,400) pounds for all moves classified under this section. All axles on the hauling unit must be load carrying with a maximum degree of equalization. The Missouri Department of Transportation shall determine whether or not the hauling unit, number of axles and axle arrangements are acceptable. In all cases the maximum axle loads, gross weight, and overall dimensions allowed will be determined by the Missouri Department of Transportation according to section 304.200 of the Missouri Revised Statutes and/or the load carrying capacity of the roadway and structures on the proposed route.

(J) Before and after studies will be conducted of the highways and bridges traversed by the movement and any resulting damages shall be repaired at the expense of the permittee as directed by the Missouri Department of Transportation.

(K) For the purpose of moves under section (15), the applicant must have insurance in the amount of two (2) million dollars combined single limit automobile liability before a permit can be issued. The applicant shall provide evidence of such insurance satisfactory to the Motor Carrier Services Division before a permit will be issued; and

(L) Approved applications will require full payment to the "Director of Revenue" by check or other suitable means of payment. The draft shall include payment of the permit fee and all evaluation fees. Roadway structures on the proposed route will be analyzed by the Missouri Department of Transportation to determine whether the move can be safely made. (See paragraph (4)(E)5 for fee schedule.)

(16) Noncommercial Building (House) Movement

(A) Permits are available for the movement of noncommercial buildings that exceed the established oversize and overweight permit limits listed in these regulations. These permits are available from district offices listed in subsection (4)(H). These rules and regulations are not intended for the movement of commercial buildings or repeated movements of similar buildings.

1. Movement of a building that will not allow one-way traffic to pass the load will be limited to no more than one (1) mile in length on the state highway system if the traffic volume on the proposed route exceeds five hundred (500) vehicles per day. If the traffic volume is less than five hundred (500) vehicles per day, movement will be considered up to a distance of three (3) miles on the state highway system.

2. Movement of a building greater than sixteen feet (16') in overall width that will allow one-way traffic to pass the load will be limited to no more than two (2) miles on the state highway system if the traffic volume on the proposed route exceeds two thousand (2,000) vehicles per day. If the traffic volume is less than two thousand (2,000) vehicles per day, movement will be considered up to a distance of ten (10) miles on the state highway system.

3. The traveled distances listed in the above two (2) paragraphs reflect the total miles of the move on the state highway system rather than miles allowed to move per attempt. Short segments of the state highway system may be used in a move provided the total mileage allowed on the state highway system is not exceeded. The district engineer or his/her representative may consider a longer travel distance if the entire move can be made during periods of lower traffic volumes listed in the above two (2) paragraphs of this section. Additional restrictions regarding travel during adverse weather conditions are at the discretion of the Missouri Department of Transportation district engineer or his/her representative.

(B) The allowable overall height, width, length, and time of travel shall be based on physical features and traffic volumes along the route. Bridges posted with a maximum weight limit of less than forty (40) tons should be avoided and will be analyzed for the type vehicle and load prior to receiving approval to cross that bridge. All axles on the hauling unit shall be load carrying with a maximum degree of equalization. The district engineer or his/her representative shall determine whether or not the hauling unit, number of axles, and axle arrangements are acceptable. When it is determined a bridge analysis is required, an additional fee shall be charged to recover bridge analysis costs. See subsection (4)(E). Loads in excess of sixteen feet (16') in width may require a sketch displaying the side and rear

view of the load with dimensions including any overhang.

(C) If the load is over seventeen feet five inches (17'5") high the applicant shall check all overhead clearance restrictions and provide written documentation from any involved utility company indicating approval to disturb aerial lines across the route. The applicant must also submit written acknowledgement from all cities/counties in which the move occurs. If it is necessary to adjust, modify, or remove state owned property such as signal and sign mast arms, flashers, signs, etc., a qualified contractor approved by the Missouri Department of Transportation shall be hired by the applicant to perform the necessary adjustment or removal and replacement. See section 324.721 of the Missouri Revised Statutes for additional information.

(D) For the purpose of moves under section (16), the applicant must have a current house mover license, applicable operating authority and must have insurance in the amount of two (2) million dollars combined single limit automobile liability before a permit can be issued. The applicant shall provide evidence of such license and insurance satisfactory to the Missouri Department of Transportation.

(E) Escort Requirements. Applicants should refer to sections 324.700 through 324.745 of the Missouri Revised Statutes for additional information pertaining to house moves. In addition to escort requirements as outlined in paragraph (9)(H)4 and subsection (9)(I), the following requirements apply to all house moves:

1. One (1) front and one (1) rear civilian escort is required for all house moves, except;
2. One (1) front and two (2) rear civilian escorts are required in Kansas City and St. Louis areas when load is required to cross bridge structures at crawl speed;
3. One (1) front and two (2) rear civilian escorts required on all sections of dual lane highways traversed if load exceeds sixteen feet (16') wide;
4. Law enforcement escorts may be required at the district engineer or his/her representative's discretion.

(17) Multi-State Permits

(A) The Missouri Department of Transportation is authorized to participate in the Multi-State Permit Program. This program provides a single, routine, uniform mechanism for processing single-trip permits for oversize and overweight vehicle combinations at the option of the department. Such a permit allows a motor carrier to travel through several states with one (1) point of contact and one (1) permit document.

(B) The same rules, regulations, and fees apply to Multi-State Permits as any other single trip permit, except the permit will be valid for a period of ten (10) calendar days. Also, these permits can only be obtained to transport loads within current envelope dimensions and weights.

(18) Permit and application forms are available from the Missouri Department of Transportation, Motor Carrier Services Division, 1320 Creek Trail Drive, PO Box 893, Jefferson City, MO 65102 or call (800) 877-8499 or (573) 751-7100.

AUTHORITY: section 304.200, RSMo Supp. 2007. This rule was previously filed as 7 CSR 10-2.010. Original rule filed July 12, 2005, effective Feb. 28, 2006. Emergency amendment filed July 3, 2008, effective Sept. 1, 2008, expires Feb. 28, 2009.

Weight – Truck-tractor semi-trailer combinations	80,000 lbs	160,000 lbs
Weight – Specialized equipment	See pages 33 – 35	152,000 lbs

Legal Gross Weight is 80,000 lbs. unless specialized equipment. Refer to pages 33 – 35 of the Oversize and Overweight Regulation Handbook for specialized equipment legal and permittable weights. Maximum permitted weight is 20,000 lbs on a single axle, 46,000 lbs on a tandem axle group, 60,000 lbs on a triple axle group and 72,000 lbs on a quadrum axle group.

Requirements To Obtain Single Trip Permit

- Year, make, license number and VIN of power unit and trailer and any other hauling units
- Load description, make, serial number and dimensions of load.
- Overall dimensions and length of trailer & load if a truck-tractor semi-trailer combination.
- Individual or group axles weights
- Individual axles spacings (center to center)
- Origin of route
- Destination of route
- Requested route
- Date of movement
- \$750,000 combined single limit automobile liability insurance

Missouri Revised Statutes

August 28, 2008

Chapter 304

Traffic Regulations

Section 304.170

Regulations as to width, height and length of vehicles.

- 304.170. 1. No vehicle operated upon the highways of this state shall have a width, including load, in excess of one hundred two inches, except clearance lights, rearview mirrors or other accessories required by federal, state or city law or regulation. Provided however, a recreational vehicle as defined in section 700.010, RSMo, may exceed the foregoing width limits if the appurtenances on such recreational vehicle extend no further than the rearview mirrors. Such mirrors may only extend the distance necessary to provide the required field of view before the appurtenances were attached.
2. No vehicle operated upon the interstate highway system or upon any route designated by the chief engineer of the state transportation department shall have a height, including load, in excess of fourteen feet. On all other highways, no vehicle shall have a height, including load, in excess of thirteen and one-half feet, except that any vehicle or combination of vehicles transporting automobiles or other motor vehicles may have a height, including load, of not more than fourteen feet.
3. No single motor vehicle operated upon the highways of this state shall have a length, including load, in excess of forty-five feet, except as otherwise provided in this section.
4. No bus, recreational motor vehicle or trackless trolley coach operated upon the highways of this state shall have a length in excess of forty-five feet, except that such vehicles may exceed the forty-five foot length when such excess length is caused by the projection of a front safety bumper or a rear safety bumper or both. Such safety bumper shall not cause the length of the bus or recreational motor vehicle to exceed the forty-five foot length limit by more than one foot in the front and one foot in the rear. The term "safety bumper" means any device which may be fitted on an existing bumper or which replaces the bumper and is so constructed, treated, or manufactured that it absorbs energy upon impact.
5. No combination of truck-tractor and semitrailer or truck-tractor equipped with dromedary and semitrailer operated upon the highways of this state shall have a length, including load, in excess of sixty feet; except that in order to comply with the provisions of Title 23 of the United States Code (Public Law 97-424), no combination of truck-tractor and semitrailer or truck-tractor equipped with drom-

edary and semitrailer operated upon the interstate highway system of this state shall have an overall length, including load, in excess of the length of the truck-tractor plus the semitrailer or truck-tractor equipped with dromedary and semitrailer. The length of such semitrailer shall not exceed fifty-three feet.

6. In order to comply with the provisions of Title 23 of the United States Code (Public Law 97-424), no combination of truck-tractor, semitrailer and trailer operated upon the interstate highway system of this state shall have an overall length, including load, in excess of the length of the truck-tractor plus the semitrailer and trailer, neither of which semitrailer or trailer shall exceed twenty-eight feet in length, except that any existing semitrailer or trailer up to twenty-eight and one-half feet in length actually and lawfully operated on December 1, 1982, within a sixty-five foot overall length limit in any state, may continue to be operated upon the interstate highways of this state. On those primary highways not designated by the state highways and transportation commission as provided in subsection 10 of this section, no combination of truck-tractor, semitrailer and trailer shall have an overall length, including load, in excess of sixty-five feet; provided, however, the state highways and transportation commission may designate additional routes for such sixty-five foot combinations.

7. Automobile transporters, boat transporters, truck-trailer boat transporter combinations, stinger-steered combination automobile transporters and stinger-steered combination boat transporters having a length not in excess of seventy-five feet may be operated on the interstate highways of this state and such other highways as may be designated by the highways and transportation commission for the operation of such vehicles plus a distance not to exceed ten miles from such interstate or designated highway. All length provisions regarding automobile or boat transporters, truck-trailer boat transporter combinations and stinger-steered combinations shall include a semitrailer length not to exceed fifty-three feet and are exclusive of front and rear overhang, which shall be no greater than a three-foot front overhang and no greater than a four-foot rear overhang.

8. Driveaway saddlemount combinations having a length not in excess of ninety-seven feet may be operated on the interstate highways of this state and such other highways as may be designated by the highways and transportation commission for the operation of such vehicles plus a distance not to exceed ten miles from such interstate or designated highway. Saddlemount combinations must comply with the safety requirements of Section 393.71 of Title 49 of the Code of Federal Regulations and may contain no more than three saddlemounted vehicles and one fullmount.

9. No truck-tractor semitrailer-semitrailer combination vehicles operated upon the interstate and designated primary highway system of this state shall have a semitrailer length in excess of twenty-eight feet or twenty-eight and one-half feet if the semitrailer was in actual and lawful operation in any state on December 1, 1982, operating in a truck-tractor semitrailer-semitrailer combination. The B-train assembly is excluded from the measurement of semitrailer length when used between the first and second semitrailer of a truck-tractor semitrailer-semitrailer combination, except that when there is no semitrailer mounted to the B-train assembly, it shall be included in the length measurement of the semitrailer.

10. The highways and transportation commission is authorized to designate routes on the state highway system other than the interstate system over which those combinations of vehicles of the lengths specified in subsections 5, 6, 7, 8 and 9 of this section may be operated. Combinations of vehicles operated under the provisions of subsections 5, 6, 7, 8 and 9 of this section may be operated at a distance not to exceed ten miles from the interstate system and such routes as designated under the provisions of this subsection.

11. Except as provided in subsections 5, 6, 7, 8, 9 and 10 of this section, no other combination of vehicles operated upon the primary or interstate highways of this state plus a distance of ten miles from a primary or interstate highway shall have an overall length, unladen or with load, in excess of sixty-five feet or in excess of fifty-five feet on any other highway, except the state highways and transportation commission may designate additional routes for use by sixty-five foot combinations, seventy-five foot stinger-steered combinations or seventy-five foot saddlemount combinations. Any vehicle or combination of vehicles transporting automobiles, boats or other motor vehicles may carry a load which extends no more than three feet beyond the front and four feet beyond the rear of the transporting vehicle or combination of vehicles.

12. (1) Except as hereinafter provided, these restrictions shall not apply to agricultural implements operating occasionally on the highways for short distances, or to self-propelled hay-hauling equipment or to implements of husbandry, or to the movement of farm products as defined in section 400.9-109, RSMo, or to vehicles temporarily transporting agricultural implements or implements of husbandry or roadmaking machinery, or road materials or towing for repair purposes vehicles that have become disabled upon the highways; or to implement dealers delivering or moving farm machinery for repairs on any state highway other than the interstate system.

(2) Implements of husbandry and vehicles transporting such machinery or equipment and the movement of farm products as defined

in section 400.9.109, RSMo, may be operated occasionally for short distances on state highways when operated between the hours of sunrise and sunset by a driver licensed as an operator or chauffeur.

13. As used in this chapter the term “implements of husbandry” means all self-propelled machinery operated at speeds of less than thirty miles per hour, specifically designed for, or especially adapted to be capable of, incidental over-the-road and primary offroad usage and used exclusively for the application of commercial plant food materials or agricultural chemicals, and not specifically designed or intended for transportation of such chemicals and materials.

14. Sludge disposal units may be operated on all state highways other than the interstate system. Such units shall not exceed one hundred thirty-eight inches in width and may be equipped with over-width tires. Such units shall observe all axle weight limits. The chief engineer of the state transportation department shall issue special permits for the movement of such disposal units and may by such permits restrict the movements to specified routes, days and hours.

(RSMo 1939 § 8405, A.L. 1943 p. 663, A. 1949 S.B. 1113, A.L. 1953 p. 568, A.L. 1957 p. 624, A.L. 1965 p. 488, A.L. 1967 p. 412, A.L. 1971 S.B. 317, A.L. 1972 H.B. 1112, A.L. 1974 S.B. 552, A.L. 1979 S.B. 44, A.L. 1980 S.B. 508, A.L. 1983 H.B. 539, A.L. 1985 S.B. 416, A.L. 1986 S.B. 784, A.L. 1988 S.B. 686, A.L. 1992 H.B. 1794, A.L. 1999 S.B. 17 merged with S.B. 19, A.L. 2000 H.B. 1142 merged with H.B. 1948, A.L. 2004 S.B. 1233, et al., A.L. 2007 S.B. 82)

Prior revision: 1929 § 7787

Section 304.180

Regulations as to weight--axle load, tandem axle defined--idle reduction technology, increase in maximum gross weight permitted, amount--hauling livestock, total gross weight permitted.

304.180. 1. No vehicle or combination of vehicles shall be moved or operated on any highway in this state having a greater weight than twenty thousand pounds on one axle, no combination of vehicles operated by transporters of general freight over regular routes as defined in section 390.020, RSMo, shall be moved or operated on any highway of this state having a greater weight than the vehicle manufacturer's rating on a steering axle with the maximum weight not to exceed twelve thousand pounds on a steering axle, and no vehicle shall be moved or operated on any state highway of this state having a greater weight than thirty-four thousand pounds on any tandem axle; the term “tandem axle” shall mean a group of two or more axles, arranged one behind another, the distance between the extremes of which is more than forty inches and not more than ninety-six inches apart.

2. An "axle load" is defined as the total load transmitted to the road by all wheels whose centers are included between two parallel transverse vertical planes forty inches apart, extending across the full width of the vehicle.
3. Subject to the limit upon the weight imposed upon a highway of this state through any one axle or on any tandem axle, the total gross weight with load imposed by any group of two or more consecutive axles of any vehicle or combination of vehicles shall not exceed the maximum load in pounds as set forth in the following table: Distance in feet between the extremes of any group of two or more consecutive axles, measured to the nearest foot, except where indicated otherwise Maximum load in pounds as set forth in Legal Weight Limit Chart, p.57.
Notwithstanding the above table, two consecutive sets of tandem axles may carry a gross load of thirty-four thousand pounds each if the overall distance between the first and last axles of such consecutive sets of tandem axles is thirty-six feet or more.
4. Whenever the state highways and transportation commission finds that any state highway bridge in the state is in such a condition that use of such bridge by vehicles of the weights specified in subsection 3 of this section will endanger the bridge, or the users of the bridge, the commission may establish maximum weight limits and speed limits for vehicles using such bridge. The governing body of any city or county may grant authority by act or ordinance to the state highways and transportation commission to enact the limitations established in this section on those roadways within the purview of such city or county. Notice of the weight limits and speed limits established by the commission shall be given by posting signs at a conspicuous place at each end of any such bridge.
5. Nothing in this section shall be construed as permitting lawful axle loads, tandem axle loads or gross loads in excess of those permitted under the provisions of Section 127 of Title 23 of the United States Code.
6. Notwithstanding the weight limitations contained in this section, any vehicle or combination of vehicles operating on highways other than the interstate highway system may exceed single axle, tandem axle and gross weight limitations in an amount not to exceed two thousand pounds. However, total gross weight shall not exceed eighty thousand pounds, except as provided in subsection 9 of this section.

7. Notwithstanding any provision of this section to the contrary, the department of transportation shall issue a single-use special permit, or upon request of the owner of the truck or equipment, shall issue an annual permit, for the transporting of any concrete pump truck or well-drillers' equipment. The department of transportation shall set fees for the issuance of permits pursuant to this subsection. Notwithstanding the provisions of section 301.133, RSMo, concrete pump trucks or well-drillers' equipment may be operated on state-maintained roads and highways at any time on any day.

8. Notwithstanding the provision of this section to the contrary, the maximum gross vehicle limit and axle weight limit for any vehicle or combination of vehicles equipped with an idle reduction technology may be increased by a quantity necessary to compensate for the additional weight of the idle reduction system as provided for in 23 U.S.C. Section 127, as amended. In no case shall the additional weight increase allowed by this subsection be greater than four hundred pounds. Upon request by an appropriate law enforcement officer, the vehicle operator shall provide proof that the idle reduction technology is fully functional at all times and that the gross weight increase is not used for any purpose other than for the use of idle reduction technology.

9. Notwithstanding subsection 3 of this section or any other provision of law to the contrary, the total gross weight of any vehicle or combination of vehicles hauling livestock may be as much as, but shall not exceed, eighty-five thousand five hundred pounds while operating on U.S. Highway 36 from St. Joseph to U.S. Highway 65, and on U.S. Highway 65 from the Iowa state line to U.S. Highway 36. (RSMo 1939 § 8406, A.L. 1943 p. 663, A. 1949 S.B. 1113, A.L. 1951 p. 695, A.L. 1957 p. 624, A.L. 1963 p. 417, A.L. 1965 p. 489, A.L. 1967 p. 412, A.L. 1983 H.B. 539, A.L. 1985 H.B. 157 merged with H.B. 330, A.L. 2000 H.B. 1948, A.L. 2001 S.B. 244, A.L. 2008 S.B. 930 & 947)

57			80,000		

Distance in feet between the extremes of a group of 2 or more consecutive axles measured to the nearest foot except where indicated.

Maximum Load in Pounds carried on Any Group of 2 or more Consecutive Axles.

The maximum gross vehicle limit and axle weight limit for any vehicle or combination of vehicles equipped with an idle reduction technology may be increased by a quantity necessary to compensate for the additional weight of the idle reduction system as provided for in 23 U.S.C. Section 127, as amended.

In no case shall the additional weight increase allowed be greater than four hundred (400) pounds.

Upon request by an appropriate law enforcement officer, the vehicle operator shall provide proof that the idle reduction technology is fully functional at all times and that the gross weight increase is not used for any purpose other than for the use of idle reduction technology.

* Except that two consecutive sets of tandem axles may carry a load of 34,000 pounds each, providing the overall distance between the first and last axles of such consecutive sets of tandem axles is 36 feet or more.

Section 304.190

Height and weight regulations (cities of 75,000 or more)--commercial zone defined.

304.190. 1. No motor vehicle, unladen or with load, operating exclusively within the corporate limits of cities containing seventy-five thousand inhabitants or more or within two miles of the corporate limits of the city or within the commercial zone of the city shall exceed fifteen feet in height.

2. No motor vehicle operating exclusively within any said area shall have a greater weight than twenty-two thousand four hundred pounds on one axle.

3. The "commercial zone" of the city is defined to mean that area within the city together with the territory extending one mile beyond the corporate limits of the city and one mile additional for each fifty thousand population or portion thereof provided, however, the commercial zone surrounding a city not within a county shall extend twenty-five miles beyond the corporate limits of any such city not located within a county and shall also extend throughout any county with a charter form of government which adjoins that city and throughout any county with a charter form of government and with more than two hundred fifty thousand but fewer than three hundred fifty thousand inhabitants that is adjacent to such county adjoining such city; further, provided, however, the commercial zone of a city with a population of at least four hundred thousand inhabitants but not more than four hundred fifty thousand inhabitants shall extend twelve miles beyond the corporate limits of any such city; except that this zone shall extend from the southern border of such city's limits, beginning with the western-most freeway, following said freeway south to the first intersection with a multilane undivided highway, where the zone shall extend south along said freeway to include a city of the fourth classification with more than eight thousand nine hundred but less than nine thousand inhabitants, and shall extend north from the intersection of said freeway and multilane undivided highway along the multilane undivided highway to the city limits of a city with a population of at least four hundred thousand inhabitants but not more than four hundred fifty thousand inhabitants, and shall extend east from the city limits of a special charter city with more than two hundred seventy-five but fewer than three hundred seventy-five inhabitants along state route 210 and northwest from the intersection of state route 210 and state route 10 to include the boundaries of any city of the third classifica-

tion with more than ten thousand eight hundred but fewer than ten thousand nine hundred inhabitants and located in more than one county; further provided, however, the commercial zone of a city of the third classification with more than nine thousand six hundred fifty but fewer than nine thousand eight hundred inhabitants shall extend south from the city limits along U.S. Highway 61 to the intersection of state route OO in a county of the third classification without a township form of government and with more than seventeen thousand eight hundred but fewer than seventeen thousand nine hundred inhabitants. In no case shall the commercial zone of a city be reduced due to a loss of population. The provisions of this section shall not apply to motor vehicles operating on the interstate highways in the area beyond two miles of a corporate limit of the city unless the United States Department of Transportation increases the allowable weight limits on the interstate highway system within commercial zones. In such case, the mileage limits established in this section shall be automatically increased only in the commercial zones to conform with those authorized by the United States Department of Transportation.

4. Nothing in this section shall prevent a city, county, or municipality, by ordinance, from designating the routes over which such vehicles may be operated.

5. No motor vehicle engaged in interstate commerce, whether unladen or with load, whose operations in the state of Missouri are limited exclusively to the commercial zone of a first class home rule municipality located in a county with a population between eighty thousand and ninety-five thousand inhabitants which has a portion of its corporate limits contiguous with a portion of the boundary between the states of Missouri and Kansas, shall have a greater weight than twenty-two thousand four hundred pounds on one axle, nor shall exceed fifteen feet in height.

(RSMo 1939 § 8384, 8409, A. 1949 S.B. 1113, A.L. 1951 p. 695, A.L. 1957 p. 624, A.L. 1965 p. 492, A.L. 1967 p. 415, A.L. 1971 S.B. 317, A.L. 1983 H.B. 539, A.L. 1988 S.B. 663, A.L. 2004 S.B. 1233, et al., A.L. 2007 S.B. 322)

Prior revision: 1929 §§ 7776, 7791

(1958) This section and § 304.180 are in pari materia and must be construed together. General gross weight limitations of § 304.180 applicable in cities of 75,000 inhabitants or more. *State v. Chadeayne* (A.), 313 S.W.2d 757. Reversed: (Mo.), 323 S.W.2d 680 where it was held that the 1951 reenactment of §304.190 applicable to the cities and area covered by this section.

Section 304.200

Special permits for oversize or overweight loads--rules for issuing--when valid.

304.200. 1. The chief engineer of the state department of transportation, for good cause shown and when the public safety or public interest so justifies, shall issue special permits for vehicles or equipment exceeding the limitations on width, length, height and weight herein specified, or which are unable to maintain minimum speed limits. Such permits shall be issued only for a single trip or for a definite period, not beyond the date of expiration of the vehicle registration, and shall designate the highways and bridges which may be used pursuant to the authority of such permit.

2. The chief engineer of the state department of transportation shall upon proper application and at no charge issue a special permit to any person allowing the movement on state and federal highways of farm products between sunset and sunrise not in excess of fourteen feet in width. Special permits allowing movement of oversize loads of farm products shall allow for movement between sunset and sunrise, subject to appropriate requirements for safety lighting on the load, appropriate limits on load dimensions and appropriate consideration of high traffic density between sunset and sunrise on the route to be traveled. The chief engineer may also issue upon proper application a special permit to any person allowing the movement on the state and federal highways of concrete pump trucks or well-drillers equipment. For the purposes of this section, "farm products" shall have the same meaning as provided in section 400.9-109, RSMo.

3. Rules and regulations for the issuance of special permits shall be prescribed by the state highways and transportation commission and filed with the secretary of state. No rule or portion of a rule promulgated pursuant to the authority of section 304.010 and this section shall become effective unless it has been promulgated pursuant to the provisions of chapter 536, RSMo.

4. The officer in charge of the maintenance of the streets of any municipality may issue such permits for the use of the streets by such vehicles within the limits of such municipalities.

5. In order to transport manufactured homes, as defined in section 700.010, RSMo, on the roads, highways, bridges and other thoroughfares within this state, only the applicable permits required by this section shall be obtained.

(RSMo 1939 §§ 8384, 8405, 8406, A.L. 1943 p. 663, A. 1949 S.B. 1113, A.L. 1972 S.B. 546, A.L. 1979 S.B. 44, A.L. 1983 H.B. 539, A.L. 1985
